PROFECIONAL EXPERIENCE

Domótica & Automatismos (2017 – 2020)

Commercial Director and Project Manager

CEO of Domótica e Automatismos, responsible for commercial and operational businesses and the area of industrial and automation projects. Knowing how to manage financial resources and adding skills in good interpersonal relationships with clients, colleagues and collaborators was the most important experience I was able to gain in the company.

Dempro SAS (2016 – 2017)

Commercial Engineer

Sales consultant, technical commercial advisor for Omron and PCB Piezotronics products.

I created a sales funnel. Collaborated with several integrators to scale automation projects.

Colombia's Merik Doors And Docks (2015 – 2016)

Commercial Coordinator from Coffee Axis

I coordinated the branch's sales operations, managed Eixo Café's industrial projects, provided commercial technical assistance, performed administrative functions and provided technical support. I developed the ability to lead technical and commercial teams. I learned how to fully manage the Branch, Successfully managed and acquired corporate clientes, I gained experience in inventory management and analysis.

INVERSIONES ANICOM S.A (2012 – 2013)

Research and Development Engineer (R&D)

Planning, design and development of projects, embedded systems programming and programmable logistics controllers (PLCs), design and creation of electrical and electronic circuits.

ACM INGENIEROS (2011)

Technical Service Engineer

Automation and integration of industrial instrumentation. We designed interactive experiences for Explora Park in Medellín, provided technical support, wired logic, programmed PLCs and microcontrollers.
